Objective

Dedicated and detail-oriented ReactJS Developer with 6 months of hands-on experience, including a successful internship at Greycell Labs Pvt. Excited to contribute my skills and knowledge in developing innovative web applications and enhancing user experiences.

Summary

- Proficient in ReactJS and Redux for building responsive, efficient, and dynamic web applications.
- Strong problem-solving skills with a focus on code quality, performance, and user-friendly interfaces.
- Experience with creating and maintaining web applications, including e-commerce sites and management systems.
- Committed to staying up-to-date with the latest web development trends and technologies.

Experience

ReactJs Intern in Greycell Labs Pvt.

- Worked as an intern, gaining valuable experience in ReactJS development.
- Collaborated with the team to develop and maintain web applications.
- Contributed to the design and implementation of responsive and user-friendly interfaces.

Technical Skills

- Programming Languages: JavaScript, Java
- Tools and Libraries: React Router
- Front-End Technologies: ReactJS, Redux, Bootstrap, CSS, HTML
- Version Control: Git
- Data Management: Rest API

Key Skills

- Coding
- Application design
- Problem solving
- Time management
- Creativity
- Leadership
- Decision making

Projects

Kinitro

Role: Jr. React.js Developer

- Collaborated on the "Kinitro" project, a React.js-based web application, to enhance functionality and user experience.
- Designed and developed interactive web pages for Create, Read, Update, and Delete (CRUD) operations, contributing to the application's overall versatility.
- Leveraged React.js to create efficient and responsive user interfaces, enhancing the project's front-end performance.

Book Store Demo App

- Developed a Book Store App using a Rest API.
- Implemented various features, including book listing, viewing book details, and shopping cart functionality using React Router.
- Achieved a responsive design for both mobile and desktop platforms.

Salon Management System

- Developed a Salon Management System as a part of my coursework.
- Utilized Java technology to create an efficient and user-friendly system.
- Built an e-commerce site using Java in my 3rd year of BSC (CA&IT) studies.
- Demonstrated strong programming skills and an understanding of web development.
